MUSKAN PATIL

Full Stack Developer

ABOUT ME

Full-stack developer on Propeter, a multi-tenant hospitality SaaS (PMS, RMS, Channel Manager, IBE). Worked from V1 (Express microservices) to V3: a Turborepo monorepo of 20+ Fastify 5 services on PostgreSQL 18 and Redis 8. Focused on revenue management, ML forecasting, PMS integrations and LLM agents.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Backend:** Node.js, Fastify 5, Express, Zod, Microservices, Turborepo
- **Frontend:** React 19, TanStack Query, Tailwind, Vite, React Native (Expo)
- **Data:** PostgreSQL 18 (pgvector, RLS), Drizzle ORM, Redis 8, BullMQ
- **AI / ML:** XGBoost, PyTorch, LLM tool-use agents, MCP
- **Architecture:** Transactional Outbox, Event-Driven, DDD, Layered Services
- **Integrations:** RMS, Oracle OPERA, GuestPoint, Xero, PredictHQ
- **Security:** JWT, AES-256-GCM, PCI DSS SAQ-A, GDPR

LANGUAGES

HINDI, MARATHI Native

ENGLISH Proficient

EXPERIENCE

07/2025 – Current | Nagpur, India

Full Stack Developer | Ideas2Goal Technologies Pvt Ltd

- Core contributor to Propeter V3 (700+ commits) across revenue, pricing, forecasting, PMS sync, AI agent and admin-web, shipped to live hotel properties.
- Led a database performance audit: index-driven loaders, partitioned audit logs and reduced write churn on high-volume pricing and forecasting tables.
- Contributed to the guest booking site and online-payment flow to WCAG 2.2 AA and PCI DSS SAQ-A.

PROJECTS

Propeter V3 · Turborepo · Fastify 5 · Drizzle · PostgreSQL 18

Revenue Management & Pricing Engine

- Built an anchor-first pricing engine with room-type differentials, rate-plan-scoped strategies, min/max guards and point-in-time rate provenance for every recommendation.
- Shipped recommendation publishing to the PMS with publish-audit trails, plus a no-publish simulation mode for what-if pricing scenarios.
- Built competitor rate shopping (Lighthouse, BrightData) and PredictHQ event ingestion into a feature store, all scheduled as BullMQ workers.
- Delivered subscription plans with per-plan limits on rooms, competitors, history and forecast horizon, enforced across services through a shared package.

Python · XGBoost · PyTorch · LLM Agents · MCP

Demand Forecasting & AI Copilot

- Built demand, ADR, RevPAR and room-revenue forecasting with booking-curve and lead-time features, gated by backtest metrics before promotion, plus a per-property price elasticity model.
- Built "Peter", a multi-agent revenue copilot with scoped, JWT-forwarded tools, an MCP surface, per-tenant prompts and conversation history.

PMS Adapters · Channel Integration · Outbox

Hospitality Platform Integrations

- Built PMS sync adapters for RMS, Oracle OPERA and GuestPoint (pull, webhooks, normalizers) and a GuestPoint OpenChannel integration, with AES-256-GCM encrypted credentials.
- Hardened the transactional outbox (retrying failed rows, recovering stale dispatches) and fixed Xero OAuth token exchange.

EDUCATION

2021 – 2025 | Bhopal, India

B.Tech in Computer Science & Engineering

Bansal College of Engineering | CGPA: 8.0/10

2020 – 2021 | Sausar, India

12th (HSC)

Queen Mary Higher Secondary School | 93.4%
